Wasp began with the desire to provide easy, straightforward, and error-free tracking solutions for SMBs. At the time, Wasp recognized most tracking solutions were designed - and priced - for enterprise-level companies, forcing most SMBs to track business-critical items manually. As Wasp's solutions evolved, the company expanded its client base to include even the largest enterprise-level clients, while maintaining a stronghold in the broad SMB market. Today, Wasp is a global leader in turnkey software and hardware solutions for inventory management and asset tracking applications, with hundreds of thousands of customers around the world adopting Wasp solutions since the brand's inception in 1994. Terms of Sale Terms of Use Returns Product Sunset Cookies Privacy GDPR Handheld scanners are designed for use in industrial settings, warehouses, and other applications where durability is required. But they can be heavy and bulky, and, let's face it: They're not always convenient. If you have staff working with products in the field or employees who have the occasional need to scan a bar code, but the frequency doesn't necessitate carrying around a handheld scanner all day, a barcode scanner app can be just the ticket to maintain functionality without adding complexity to otherwise simple processes. The great thing about barcode scanner and inventory apps is that they're often compatible with your existing software, and many are available with cross-device compatibility. That means your team could be using their personal smartphones to scan barcodes on the job, with a minimal additional cost to your organization, provided security can be adequately mitigated with a BYOD (Bring Your Own Device) policy. The following 36 apps are among the most functional and popular applications available for scanning barcodes. While they're not rated or ranked in any particular order, we've provided all the information you need to decide which app is best for your unique needs. The 36 Best Barcode Scanner Apps and Readers Table of Contents Cross Platform Compatible Apps iOS-Only Apps Android-Only Apps Cross-Platform Compatible Apps The ASAP BarCloud App is actually a complete, cloud-based asset management or inventory program, accessible from any iOS or Android device, as well as from any Internet browser. With automatic backup and the ability to schedule your own custom backups, your data is always secure and readily accessible. Simple inventory counting to complex systems, such as batch-lot and serialized inventory, are supported, and you'll never lose track of shared assets with BarCloud's check-in and check-out system. There aren't an abundance of user reviews available, but the mobile apps earn four stars or better on both iTunes and Google Play. Not quite the traditional ready-to-go mobile app, Scandit is an option for developers who are building apps that would benefit from scanning capabilities, as well as enterprises commissioning proprietary mobile apps where this capability would be a value-added component and alleviate the need to download a third-party application. OS: iOS, Android, and Symbian, Phonegap plugin Download: Get Trial or Full Downloads here. iTunes Rating: N/A Google Play Rating: N/A Key Features: Transform smartphones, tablets, and wearable devices into barcode scanners Lightning-fast, accurate barcode scanning Wide range of symbologies supported Doesn't require autofocus Scans at any angle Size does not impact accuracy Cost: Community - FREE (or 8% of your paid app price) Enterprise Basic - \$199/month Enterprise Premium - \$399/month Scan to Spreadsheet is a simple app with simple functionality. But sometimes, that's exactly what users need; a basic app that scans barcodes and stores data in a central database, Scan to Spreadsheet is precisely what you're looking for. A few reviewers criticize its lack of flexibility and customization tools, but others like its basic features. OS: iOS, Android Download for iOS: Download for Android: iTunes Rating: 4+ Google Play Rating: 3.4/5 stars Key Features: Date and time stamp Custom fields for data entry Maintains one large database with information Cost: Android - \$0.99 iTunes - \$2.99 With QuickMark, you can not only scan, but create barcodes and QR codes. The cross-platform scanner reads multiple types of barcodes and multiple barcode formats, making it one of the most versatile barcode apps available. With less manual data entry, you can quickly and easily record URLs, item names, locations, and much more. Overall, owners seem to be pleased with the QuickMark app, although a few users complain that it doesn't scan much. OS: Android, iOS, Windows Download for Android: Download for iOS: Other Download Options: Google Play Rating: 4/5 (21,327) iTunes Rating: 4+ Key Features: Quickly scans multiple QR code and barcode formats Not fully cross-device compatible Attach images to records for more transferability Accurate and simple; email and transfer data Cost: FREE ScanLife is a barcode inventory app that allows consumers to scan QR codes and barcodes on any product and pull up information such as nutritional facts and ingredients, prices, and nearby locations where products can be purchased in real time. The ScanLife app is part of a larger platform for businesses who want to better engage mobile users, by incorporating QR codes into marketing strategies. With nearly 48,000 user reviews on Google Play alone, ScanLife gets positive feedback overall. OS: iOS, Android Download for iOS: Download for Android: iTunes Rating: 4+ user rating 4/5 stars (46,700+ ratings) Google Play Rating: 4/5 stars (46,700+ ratings) Key Features: Complete history of everything you've scanned, even offline Send an email to yourself as a reminder for later Nutritional information and ingredients for food products Find products and prices at online and brick-and-mortar retailers Built-in Facebook and Twitter sharing options Business platform enables better consumer mobile engagement Cost: Basic - \$25/month Basic Plus - \$85/month Enterprise - \$199/month Contact for a quote (free trial) NeoReader gets tons of user feedback at the iTunes and Google Play Stores, but it seems the most current version fares much better than previous editions of this app. At iTunes, the current version earns an average rating of 4.5 stars out of 5, in just over 30 user reviews. The overall rating, however, is just two stars, based on more than 5,200 user reviews. Most users say it scans practically any code, in contrast to typical barcode scanner apps, which can be limited on the scope of their scanning capabilities. OS: Android, iOS, Blackberry, Windows, Ovi Download for Android: Download for iOS: iTunes Rating: 4+ user rating 2/5 stars (5,200+ ratings) Google Play Rating: 4/5 stars (18,600+ ratings) Key Features: Scans the broadest set of 1D and 2D barcodes, including: QR, Data Matrix, Aztec, EAN, UPC, Code 39, Code 128, PDF 417, and more Automatically detects code type Create your own QR codes for free Omni-directional, live-stream scanning Full scanning history Scans vCard, mCard, WiFi, phone number and email codes Built-in sharing for email, SMS, Facebook or Twitter Cost: FREE i-nigma is free to download, but the company uses advertising to offset some of the development and ongoing maintenance costs. This causes some users to gripe about small ads on the dashboard, but most don't seem to mind and say they have no problems scanning just about any barcode using this app. It scans vCards and MECARds to act as a streamlined Rolodex, instantly storing contact information in your phone's contact list, opens maps with Geo codes, and adds events to your phone's calendar with calendar barcodes, all in addition to scanning QR, DataMatrix and UPC/EAN codes for a fully-functional app for reading barcodes. OS: iOS, Android, Blackberry, Windows Download for iOS: Download for Android: iTunes Rating: 4+ user rating 4/5 stars (260+ ratings) Google Play Rating: 4.4 stars (6,600+ ratings) Key Features: Scans QR, DataMatrix and UPC/EAN codes SDK provides additional code compatibility Scan typically difficult codes, such as colored, creative, or reversed codes No need to pre-set barcode types Share scanned codes through social media, SMS, email Create your own QR codes Scan vCards or MECARds to easily store contacts Geo barcodes to open maps Calendar barcodes add events to your calendar Cost: FREE Lynkee is a barcode scanner app geared more towards the consumer than the inventory control or asset manager, but it is a simple and handy app with the ability to scan a variety of 1D and 2D barcodes, including DataMatrix barcodes. Scan vCards and MECARds to store contact info, compare prices, search your scanning history and more. Users say this barcode reader application is quick and accurate, but there are a few complaints from users who just can't seem to get it to open or scan properly. OS: Android, iOS, Windows Download for iOS: Download for Android: iTunes Rating: 4+ user rating 4/5 stars (520+ ratings) Google Play Rating: 4/5 stars (520+ ratings) Key Features: QR code generator Read barcodes from camera, file or webpage Reads a variety of 1D and 2D barcodes, including vCards, Geolocation, URL, DataMatrix, Flashcode and more Add and share product reviews Create a Lynkee profile Cost: FREE A free optical barcode scanner app that supports 2D, Bidi and 1D (DataMatrix / QR/Ean 8 & 13) barcodes, UpCode is designed to be simple and straightforward to use. Users can create their own optical barcodes for free, and scan any supported barcode to quickly access content like music, images, videos, files, websites, and more. Built-in sharing features enable you to share the content you discover with your contacts, as well. This barcode app gets just two stars at iTunes, but no written reviews are available, so it's difficult to tell why users give it a low rating. Google Play users generally like it, but some think it's just standard technology and nothing special. OS: iOS, Android, Lumia and Windows Download for iOS: Download for Android: Main Download: iTunes Rating: 4+ user rating 2/5 stars (130+ ratings) Google Play Rating: 3.9/5 stars (315+ ratings) Key Features: Quickly scans 2D, Bidi, 1D barcodes Supports DataMatrix, QR, Ean 8 & 13 1D barcodes Create your own optical barcodes Access music, videos, websites, and other content Cost: FREE BeeTagg has a set of apps: a mobile barcode scanner app, a QR code generator app, an app for contacts management and generating your own personal QR-code business card, a PriceCheck app and now even a mobile app to make fancy, designer QR codes. A free barcode app, BeeTagg is pretty sophisticated in terms of its scanning functionality, but it doesn't offer any comprehensive built-in database capabilities. That said, you can copy and paste information and codes for later documentation. Users generally say it works okay, but there are some difficulties reported with 1D codes and certain phone models. OS: iOS, Blackberry, Android, Windows, Samsung, Ovi Download for iOS: Download for Android: Main Download: iTunes Rating: 4+ user rating 2.5/5 stars (450+ ratings) Google Play Rating: 3.4 stars (880+ ratings) Key Features: Goes beyond merely opening a browser window Contextual actions Obtains more info from a single code than most barcode scanner apps 2D codes including QR Codes, BeeTagg Codes and Datamatrix 1D codes including EAN-13 and UPC-A Create your own contact code to exchange information Supports a variety of content types, including vCard, mCard, Text, SMS, eMail, Geo, Event. Cost: FREE Kaywa claims to be the best mobile barcode scanning app around, and users seem to agree for the most part. This app gets solid reviews on both iTunes and Google Play, with users saying they love that the scan images are held in memory for later reference. That said, data for this QR barcode reading app is stored in your phone's internal memory. That means it may eventually slow down other apps, and it can't be easily removed and transferred to another device if you switch. Otherwise, it lives up to its claim of speed, accuracy, and simplicity. OS: Android, iOS Download for iOS: Download for Android: iTunes Rating: 4+ user rating 4/5 stars (40+ ratings) Google Play Rating: 4.1/5 stars (460+ ratings) Key Features: Free QR code generator Scans all types of barcodes Automatically detects code type History with scan image, text and geolocation data Contact cards with landscape mode Cost: FREE EZ Office Inventory is a complete office inventory management platform that comes with a free barcode scanning app to streamline the tracking and maintaining accurate inventory counts. When combined with the full-feature program, you can take advantage of features such as data backup, chart-based actions, bundles, and more. Users say it's easy to set up, easy to use, super functional, and is ideal for a variety of applications. OS: iOS, Android, Windows Download for iOS: Download for Android: iTunes Rating: 4+ user rating 3.5 stars (11 ratings) Google Play Rating: 4.4/5 stars (25 ratings) Key Features: Supports custom barcoding Mass scanning Member ID card scanning Real-time asset locations, assignments and alerts Delegated model allows custodians to be active participants Cost: App - FREE EZ Office Inventory Plans & Pricing: Silver - \$29.99/month Gold - \$49.99/month Platinum - \$95/month Corporate - Contact for a quote Scout is a product of TopShelf, a web-based and fully mobile-enabled inventory management system that can be used either as a standalone software platform for managing inventory and asset control, or can be configured as an adjunct to an existing application, such as accounting software or CRM. Available for most modern devices, Scout earns middling scores from users who say it works, but it seems slow and sluggish. OS: iOS, Android, Blackberry Download for iOS: Download for Android: iTunes Rating: 4+ (not enough customer ratings) Google Play Rating: 3/5 stars (21 ratings) Key Features: Scan barcodes Create transactions Ship and pack products Print barcodes to any barcode-enabled printer Reporting functions Generate list and serial numbers Manage returns and tasks Cost: Mobile App Pricing: FREE (Android) \$0.99 (iTunes) Platform Pricing: TopShelf Plus+ - \$50/user/month TopShelf Advanced - \$69/user/month TopShelf Enterprise - \$120/user/month TopShelf Unleashed - \$150/user/month OnHand BT is a product of Steven's Creek Software, designed to streamline inventory management by turning an existing mobile device into a barcode scanner. It captures all one-dimensional barcodes, and it has a built-in calculator for entering data or changing quantities. With a number of features designed to make the inventory process simpler, such as a restocking mode, it's a useful platform for any business dealing with inventory. It is one of the more expensive barcode apps available, though, at about \$30 on iTunes and \$40 on Google Play. There aren't an abundance of user reviews, but the few available reviews indicate that developer support is excellent and features and functions are adequate for a variety of settings. Download for Android: Download for iOS: iTunes Rating: 4+ (Not yet enough reviews to determine an average rating for the current version.) Google Play Rating: 5.0 (2 reviews) Key Features: Built-in calculator to change counts for large amounts Quantity, barcode, name, note, named location, date/time created, date/time last modified User-configurable input and output Multiple modes including: restocking mode, multi-location mode, 'Pick and Pack' mode for shipping applications, and more Input and output with UTF-8 encoded text to support special characters and non-Latin alphabets Cost: \$29.99 (iTunes) \$29.95 (Google Play) Users say CLZ Barry is quick, accurate and efficient, although a few complain that it doesn't have a feature for entering ISBN book codes. It's really geared to the collector audience, for those who collect things like comic books, DVDs and the like. Because it can be configured to export data to Excel and other programs, it's useful for a variety of applications, and users say it's a huge time-saver. This barcode scanning application requires Android 2.1 or higher, so it may not work on all devices. Download for iOS: ◆(NOTE: link only works for iOS users with an iTunes account or iPhone) Download for Android: iTunes Rating: 3.5 stars (8 ratings) Google Play Rating: 4/5 stars (165+ ratings) Key Features: Supports UPC, EAN, ISBN, UPC+5 barcodes and QR codes Transmit scanned data to your PC or MAC Integrate data collection with any program or text document on your desktop Offline scanning Send scans in batch Targeted to the collector audience Automatic title and image look-up Cost: \$7.99 With CodeREADr, you can turn your mobile devices into enterprise-grade barcode scanners and data collection tools. Quickly and accurately scan all types of 1D and 2D barcodes, collect photos, and more, with the option to store your scan data on your own servers or in the cloud. Download for iOS: link may only work for iOS users with an iTunes account or iPhone) Download for Android: iTunes Rating: 3.5 stars (11 ratings) Google Play Rating: 3.5 (238 ratings) Key Features: Easy, rapid barcode scanning Voice and text search On-device backup ensures your scans are always saved Auto next scan input the barcode type. Those who want to share contact information via a 2D code may be initially put off by the idea that this requires constant access permission, but the company assures users that their personal privacy settings are honored. Users, however, say this barcode reader asks for a slew of permissions. OS: Android, Blackberry, Windows Mobile, JavaME Download for Android: Google Play Rating: 3.8/5 stars (2,700+ ratings) Key Features: Capable of scanning rotated DataMatrix codes and barcodes Instant search Scan history Bulk mode Send small text files via email Not compatible with iOS devices Cost: FREE Another barcode scanning app exclusively for Android devices, Hi Tec's GetBlue Bluetooth Reader offers a variety of data collection methods and exporting options, including files, spreadsheets, third-party applications and more. GetBlue gathers data from any supported data source and forwards it to any supported Bluetooth SPP and Bluetooth RFCOMM. Any Bluetooth that supports the Serial Port Profile, such as SPP or RFCOMM barcode scanners, can be used. Download for Android: Google Play Rating: 3.9/5 stars (450+ ratings) Key Features: Collects data from Bluetooth SPP, serial USB, TCP/IP, HTTP and camera scanners automatically Exports via files, spreadsheets, etc. Bi-directional device communication support is provided Manual data input; device commands may be entered manually Functions as a keyboard wedge Cost: Demo version: FREE The Wireless Barcode Scanner is another product by Tec-It, but unlike its sister products, this barcoding app doesn't yet have any user feedback. With adjustable 1D and 2D barcode scanning support, adjustable character sets, and compatibility with some standard software tools, the Wireless Barcode Scanner offers usability and functionality for a variety of uses and applications. This mobile barcode app only works with Android devices. Download for Android: Google Play Rating: 0 (no ratings available) Key Features: Adjustable 1D/2D barcode support Adjustable character set All scanned barcodes are stored for later access Supports adjustable barcode prefixes, suffixes, and various decoding character sets Can be read with standard software tools from virtual serial port Single shot or batch scanning Cost: \$12.99 Inventory Droid, as its name suggests, is available only for the Android operating system. A similar barcode app is available for web-based reporting and inventory tracking that's compatible with iOS devices, but this app does not support barcode scanning. Inventory Droid gets positive feedback overall, with a few quirks noted. For instance, one reviewer says she'd prefer that the inventory search evaluates her inventory only, not that of Amazon and other online retailers. OS:

Android Download for Android: Google Play Rating: 4/5 stars (298 reviews) Key Features: Custom fields, field units, and scannable fields Multiple accounts and categories for streamlined management CSV import/export Account backup and restore Built-in shopping features Loan reminders Store photos and receipts in SD folders Cost: \$4.99 Other than some compatibility issues with specific devices, users say the Barcodescanner Keyboard works well. With multiple keyboard layouts to support a variety of languages, this reader application is both versatile and functional. Download for Android: Demo: Full: Google Play Rating: 4.2/5 stars (60+ ratings) – full version Key Features: Multiple keyboard layouts available for language support Automatically fills fields with scanned barcode information Can be configured with target application control keys Does not require Internet or SMS control permissions Secured data is protected from keylogging Scans in landscape or portrait mode Cost: Free Demo Full paid version: \$3.99 ScanPet is a barcode app for Android devices, and it's compatible with the Kindle Fire. This barcode app garners feedback from more than 1,500 users on Google Play, where it earns an average rating of 4.1 stars out of 5. ScanPet uses Excel as an item database, enabling the app to function as a complete inventory management application – all managed by your smartphone, which doubles as a scanner. It's being used for everything from personal CD collections to business inventory. With exporting options and a slew of other features, it's easy to get the essential inventory data you need to other applications and programs. There's a basic, free version and a more sophisticated, paid version available.
